Ensuring Unmatched Reliability and Security for Your Business Success

At The Mortgage Office (TMO), we are committed to delivering the most secure and reliable loan management software on the market. Our platform allows you to focus on scaling your business without worrying about system outages or data loss. Here's how we ensure both **Reliability** and **Security**.

Reliability

Managed Cloud SaaS on Azure

TMO runs on secure and scalable Azure infrastructure, offering optimal performance for all users.

Auto-Scaling VMs

Our system adjusts computing power automatically to handle increasing traffic and ensure smooth operations.

Disaster Recovery (DR)

We have comprehensive recovery plans in place to minimize downtime and ensure business continuity.

Regular Database Backups

We perform backups every four hours and retain daily backups for up to four weeks, ensuring no data loss.

Data Accessibility

TMO makes data easily accessible to your team with the right user permissions, allowing export to Excel, API, or database file formats when needed.

Security

Endpoint Security & Threat Detection

Antivirus and anti-malware tools are automatically updated and continuously monitor endpoint devices.

SOC 2 Audits

TMO undergoes annual SOC 2 audits, staying ahead of the latest cybersecurity technologies and protocols.

Data Encryption

All data, both in transit and at rest, is protected through Azure's managed encryption capabilities.

Incident Response

Our well-defined response policy quickly addresses any security incidents, ensuring minimal disruption.

Discover how TMO can elevate your loan management with unparalleled security and reliability.
